

Veeam Cloud Connect

Veeam Cloud Connect enables IT to create disaster recovery programs and deliver off-site backup and recovery services simply and easily.

How it works:

Three Simple steps:

- **Sign Up:** Complete our Veeam Cloud Connect sign-up form on our website for a 30 day trial.
- **Configure:** Configure your Veeam backup software to point to Racksquared as your preferred service provider for Cloud Connect. Login with the user name and password we provide.
- **Backup:** Select your backup schedule and backup your data to Racksquared Data Center's backup target. Restore from Racksquared at any time with no additional cost.

KEY BENEFITS:

- **Simplified Management:** Unified Solution suite for data protection, backup and recovery from a single source platform.
- **High Speed Recovery:** Ensure your SLAs for recovery time and point objectives are always met.
- **Straightforward Pricing:** Consumption-based modeling for recovery, avoiding expensive CapEx funding.
- **Powerful Encryption:** Encrypt all data at rest and in flight for additional security and compliance measures.
- **Multi-Hypervisor Support:** Protection for VMware vSphere, Microsoft Hyper-V, and physical servers.
- **Backup Verification:** Guaranteed recoverability of your data with verification and VMware and Hyper-V backups.
- **Built-in WAN Acceleration:** Get backups off-site faster and save Bandwidth.
