

# iSAN V 7000 Series

High Performance Upgradeable Virtual Tape Library

Up To 4 GB/s

Eliminate the headaches and challenges of archiving and protecting your valuable data with a Cybernetics Virtual Tape Library. Incredibly easy to install, manage, and scale, the iSAN V7000 VTL is a powerful disk based backup solution with up to 240TB of raw, native capacity. Naturally immune to malware, cryptolockers, and ransomware, the iSAN V7000 delivers unparalleled data security that can be further increased with optional encryption.

Benefit from the performance, and redundancy of disk and achieve much faster than tape backup and restore speeds with little to no learning curve for backup administrators. Use any existing tape backup software to consolidate backups across any mix of operating systems with support for SCSI, iSCSI, SAS, and FC. By default, up to sixteen different parallel backup streams can be written/read simultaneously to increase overall performance.

Minimize the bandwidth required for off-site replication by taking advantage of the industry's best deduplication ratios. Cybernetics' VTLs average between 50:1 and 200:1 reduction in data size, making off-site replication accessible to all bandwidth limitations without negatively impacting backup speed or restore performance.

Increase capacity as needed with Cybernetics' scale-out architecture that extends ROI for several more years than competing brands. The V7000 supports up to six expansion cabinets, each capable of holding up to sixty 3.5" drives in a 4U enclosure.

Whether you're looking to get rid of tape or augment your existing library with something faster, more reliable, scalable, and safer, the Cybernetics' V7000 is an ideal choice for any System Administrator looking for a better, more modern disaster recovery solution.

**Faster Backups And Restores, With Or Without Tape**

**Minimize Bandwidth Requirements**

**Scale-Out Architecture For Increasing Capacity As Needed**

**Easy-to-Use Graphical User Interface Puts Powerful Features At your Fingertips**

**Eliminate Daily Administration With Automated Settings**

**Lifetime Technical Support U.S. Based Call Center**

**CYBERNETICS**

Powerful Data Backup Solutions

**Scale-Up  
Performance,  
Scale-Out  
Capacity.**

iSAN® V 7000 Series

iSAN v7124<sup>S</sup> Series

iSAN v7124<sup>T</sup> Series

Disk Drive bays	24 - 2.5" Bays	24 - 3.5" Bays
Scalable	1 head unit plus 6 expansion units	
Transfer Rate	Up to 4 GB/s	
Disk Drives	SAS, SSD	
RAID Levels	0, 5, 6	
Hot Swap/Redundant	Power Supplies, Disk Drives	
Dedicated I/O Cache	256 GB	
System Type	( Standard 2U Rackmount )	( Standard 4U Rackmount )
Network Interface	Two 1 GbE Ports ( 1 Admin Port, 1 Data Port ) per controller, Two USB-2 Ports, One 12 Gb/s SAS device/host port	Four 1 GbE Ports ( 1 Admin Port, 3 Data Port ) per controller, Two USB-3 Ports, Two 12 Gb/s SAS device/host ports
Power Supply	Dual 1200w @ 110-140VAC Auto-Switching	
Electrical	47-63 Hz 15-7.5A	
Power Consumption	344 watts average	381 watts average
Heat Output	1,174 BTU/HR average	1,301 BTU/HR average
Max. Ambient Temperature	< +30° C ( < +86° F )	
Weight	70 lbs.	71 lbs.
