

## Disaster Recovery Solutions

**Over 90% of companies fail within 1 year of being struck by a disaster.**

*FEMA and US Small Business Administration*

Your business runs on IT and when IT is down, your business is down. This can lead to lost revenue, upset customers, operational expenses and damage to your reputation. The key to mitigating the damage is to have a comprehensive disaster recovery plan and solution in place. Racksquared Data Centers has experts who can work with you to design and implement a solution that meets your business needs. These solutions reduce the adverse impact of a disaster by getting your business up and running as quickly as possible.

“We partner with Racksquared for disaster recovery because an outage would be disastrous to our business. Our IBM Power server maintains all the information and infrastructure we need to administer nation-wide distribution. Without it, everything would be halted.” Donnie R. Masden, Mercer Transportation

# Racksquared's Solutions for your Business

## High Availability Disaster Recovery

When the cost of downtime is high, you need a solution that gets you back up and running fast.

Racksquared offers high availability solutions for Intel and IBM Power reducing recovery time from hours to minutes.

## Reserved Hardware Disaster Recovery

Having peace of mind is important knowing that if the worst happens, you have a place to go.

Racksquared offers a hardware reservation that guarantees you access to infrastructure if disaster strikes.

## Disaster Recovery Testing

Be confident by testing your plan. With Racksquared's disaster recovery solutions, you can go as far as a role swap where your business runs on the disaster recovery infrastructure for a period of time.

## Why Racksquared?

Whether it is your production systems or disaster recovery, our team is focused on keeping your business up and running. We do this by providing you with access to technical expertise, the latest technologies, and a secure reliable, resilient environment.

### Expertise

Racksquared's disaster recovery experts can design and implement a DR solution to meet your specific business needs. These solutions are designed to get your business back up and running as quickly as possible.

### Technology

Racksquared leverages technology from industry leaders like IBM, Microsoft, Veeam, and Cybernetics to develop your solution. These technologies are managed and maintained to stay current and protect your business.

### Environment

Racksquared's infrastructure is designed to be secure, reliable, and resilient so you can always get to your Intel or IBM Power servers. When the unexpected happens, we are always ready and prepared to deliver service to your business.
