WHY OUTSOURCE YOUR DATA CENTER?

Lower upfront costs

Reduce your capital investment as well as hardware and software maintenance fees

Outsourcing saves an estimated \$12 million over 15 years compared to building and managing a data center according to Forrester Research¹

Only pay for what you use

Avoid costly idle capacity—there's no need to buy expensive new equipment that doesn't match your needs

Scalability

"Pay as you grow" and employ additional capabilities as you need them

Carrier Neutrality

Choose from multiple high performance carriers

High Availability Disaster Recovery

Protect against data loss, revenue loss, get up and running immediately

Dedicated security and reliability

24/7 Monitoring and protection, uninterrupted power supply, redundancy, and backups keep your data safe and secure

Racksquared is uniquely qualified to support your data center technology

Our operating systems include OS400, AIX, Linux, Windows Server 20XX

With in-house IBM AIX/Redhat/iSeries expertise, we can handle your IBM PTFs, Technology Refreshes, and version upgrades
