

Disaster Recovery Test Program

This program allows a company to test their i-Series disaster recovery processes and procedures to ensure that, in the event of a disaster, your IT organization knows that you can recover your applications and data successfully.

Full Suite of Services

Racksquared is a unique solution provider that maintains significant in-house talent and resources that are available for our clients. Our expert staff of network engineers, server engineers, systems administrators and product specialists are passionate about sharing their knowledge and translating that into a high value, flexible solutions that provide our clients with virtualization consulting/hosting services, managed IT services for all types of computing environments including IBM i-series, public cloud, private cloud, hybrid cloud, backup/storage solutions, server collocation and disaster recovery.

Racksquared iSeries Cloud Services

- Hosting Solutions
- Backup Solutions
- Disaster Recovery Solutions
- Management Solutions (local or remote)
- Monitoring Solutions (local or remote)

Disaster Recovery Program:

Program Includes:

- 72 hours use of system
- 10 hours of services
- Requires two weeks notice
- Use of Tape Drive

Recovery time is estimated 12 to 36 hours depending on the size and type of data being restored. Program licenses are the responsibility of the customer to obtain.

Updated backup and recovery plan will be provided at the end of the test.

Great for companies trying to determine recovery time objective.

About Racksquared

Racksquared was born out of the many years of success that Wasserstrom Holdings and its subsidiaries have had in making technology an important differentiator for their businesses. Over the years of IT success and the multiple investments made in technology infrastructure it became clear that the opportunity to enable other corporations to take advantage of these investments made business sense for both the prospective customer requiring enterprise class services and support and Wasserstrom Holdings. Thus, Racksquared was born.

Today, Racksquared handles the day-to-day enterprise technology operations of several companies in addition to the Wasserstrom Holdings family of companies. Our staff knows and understands the required processes, technologies and flexibility that makes a large and/or a fast growing company's infrastructure successful in meeting the demands of today's best run companies.
