

Solutions That **PROTECT** Your Business

COLOCATION

Colocation enables the agility to safely and securely deploy your server or storage infrastructure at remote locations without the cost or time required to develop your own sites. Our highly skilled engineers are equipped and available to design a colocation solution that best fits your company.

DISASTER RECOVERY

Racksquared has the storage, software, and dedicated IT team to build a disaster recovery plan and site to fit your needs. Our data experts can also use different types of hardware including IBM Power Systems™ to test and validate backup media as part of a disaster recovery test.

CLOUD & BACKUP

At Racksquared Data Centers, there are several cloud and backup options – AIX Cloud Hosting and Management, AS/400, Linux on Power Cloud Hosting, Private Cloud Hosting, and Public Cloud Servers. All of which are standard rates for memory and storage, making it easy to know what your bill is each month.

WHO WE ARE

Racksquared Data Centers is a unique solution provider and proactive partner that maintains significant in-house talent and resources that are available for our clients. Our expert team of Network Engineers, Server Engineers, Systems Administrators and Product Specialists are passionate about sharing their knowledge and translating that into high value, flexible solutions.

- Racksquared is owned by Wasserstrom Holdings Company that has been headquartered in Columbus, Ohio since 1902
- Racksquared operates two data centers in the Central Ohio market
- Our team has earned VCP certifications from VMWare, CCNA and CCNP from Cisco, AIX from IBM, and CompTIA
